

INTRODUCING THE SIDEWINDER[®] RESCUE.

PERSONAL DISTRESS MARKER LIGHT

NSN# 6230015812486

The new Sidewinder[®] Rescue has all of the functions of a Sidewinder[®] personal illumination tool with all the visibility you require in a strobe/beacon. Featuring White, Blue, Green and IR LEDs that require no filters, the Sidewinder[®] Rescue can illuminate pre-flight checks, serve as a cockpit illuminator, and allow you to conduct covert or eye-safe in flight activity. You can select from 50 BPM or 110 BPM for a ground based visual location signal or a water rescue distress beacon strobe. All this, and conveniently powered by AA batteries. Plus, it fits all existing mounts for combat, flight, and operator style helmets. The new Sidewinder[®] Rescue from Streamlight, helping to make sure no one gets left in the dark.
